### **DETAILED ACTION**

This Action is in response to Amendment filed 06 June 2008. Claims 1-12 are now pending in the present application.

#### ***Examiner's Amendment***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Paul Tsou on 23 June 2008.

In the claims:

Claim 6 in the application has been amended to read as follows:

6. (Currently Amended) A computer system comprising:

a holding unit for holding pieces of data as processing objects and first characteristic values calculated based on the pieces of data while associating the pieces of data with the first characteristic values respectively; and

a providing unit for accepting a received characteristic value as an information request for a piece of data as a processing object from a requester and selecting the piece of data associated with the received characteristic value from the pieces of data held by the holding unit to provide the piece of data to the requester;

wherein the holding unit holds a characteristic value calculated by an operation unit based on a second characteristic value set, wherein the piece of data is divided into a sequence of data fragments each having a predetermined size, the second characteristic value set being calculated based on the data fragments; and

the providing unit provides respective second characteristic values contained in the second characteristic value set to the requester when the received characteristic value accepted as an information request for a piece of data as a processing object is associated with the second characteristic value set.

***Allowable Subject Matter***

Claims 1-2 are cancelled.

Claims 3-14 are allowed.

The following is an Examiner's statement of reasons for allowance:

Consider claims 3, 5-6, and 9-10. None of the prior arts of record teach or suggest the claimed limitations of a holding unit for holding pieces of data as processing objects and first characteristic values calculated based on the pieces of data while associating the pieces of data with the first characteristic values respectively; a providing unit for accepting a received characteristic value as an information request for a piece of data as a processing object from a requester and selecting the piece of data associated with the received characteristic value from the pieces of data held by the

holding unit to provide the piece of data to the requester; an operation unit for calculating a characteristic value based on the piece of data as a processing object, wherein the operation unit divides the piece of data into a sequence of data fragments each having a predetermined size, calculates second characteristic values based on the data fragments respectively, holds the data fragments and the second characteristic values in the holding unit while associating the data fragments with the second characteristic values respectively, generates a sequence of the second characteristic values corresponding to the sequence of data fragments, calculates the characteristic value based on the sequence of the second characteristic values, and holds the sequence of the second characteristic values and the characteristic value in the holding unit while associating the sequence of the second characteristic values with the characteristic value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
